# Practice Quiz: Newton's Second Law CONCEPTUAL PHYSICS: UNIT 3 

Directions: Use the equations below to solve the following problems. You must show all of your work to receive credit. This includes: 1) showing what is given, what you are trying solve for (2 points) 2) showing equation (2 points) 2) showing your work (2 points) 3) answer with correct units (2 points). A total of 8 points/question. Total points $=40$ points

$$
F=m a \quad a=\frac{F}{m} \quad P=\frac{F}{A} \quad \mathrm{~F}_{\mathrm{g}}=\mathrm{mg}
$$

1. You pull horizontally on a $\mathbf{1 0 0} \mathbf{- k g}$ crate with a force of $\mathbf{5 0 0} \mathbf{N}$ and the friction force on the crate is $50 \mathbf{N}$. The acceleration of the crate is?
2. A car has a mass of $\mathbf{1 0 0 0} \mathbf{~ k g}$ and accelerates at $\mathbf{3 . 0}$ meters per second squared. What is the magnitude of the force acting on the car?
3. A tow truck exerts a force of $\mathbf{8 0 0} \mathbf{N}$ on a car, accelerating it at $\mathbf{2} \mathbf{~ m} / \mathbf{s} / \mathbf{s}$. What is the mass of the car?
4. You are standing on a skateboard and your friend pushes you with a force of $\mathbf{1 5 0} \mathbf{N}$. If your mass is $\mathbf{1 0 0} \mathbf{~ k g}$, what will your acceleration be?
5. What is the acceleration on the box being pulled below?
